This course is designed for physicians, nurse practitioners, physician assistants, nurses, residents, and other healthcare professionals involved in primary and specialty care for children with acute or chronic conditions. Participants will learn about and be able to implement into care that they provide: current assessment modalities and interventions pertinent to the care of infants, children, and adolescents in various settings; addressing mental health issues (autism disorder, suicidal ideation & more) in children and adolescents; addressing pediatric chronic conditions at school; improving infant feeding and managing complex care in pediatrics; advocacy initiatives for children; addressing eating disorders, addictions, and gynecology in adolescents; and new tips on care from pediatric subspecialties including neurosurgery, infectious disease, pulmonology, cardiology, and dermatology.

Objectives - At the end of this activity, participants will be able to:
- Diagnose and manage mental health conditions of children related to elimination disorders, safety plans for suicidal ideation, and autism spectrum disorders.
- Improve the health care professionals' knowledge of adolescent medicine related to eating disorders, addiction medicine and adolescent gynecology.

7:30 a.m. Preconference continental breakfast & networking
